## Professional Summary

---

Motivated Computer Science and Design student seeking an entry-level Full Stack Developer role, with hands-on experience in building web applications using React, Node.js, and MongoDB. Strong foundation in DBMS and problem-solving, with a focus on developing scalable, efficient, and user-friendly applications. Eager to apply technical skills to real-world projects and continuously grow as a developer.

## Education

---

|                            |                                   |            |
|----------------------------|-----------------------------------|------------|
| Kongu Engineering College  | B.E – Computer Science and Design | CGPA: 8.28 |
| Royal International School | SSLC: 91.6%                       | HSC: 83.6% |

## Area of Interest

---

Object-Oriented Programming (Java & problem solving), Database Management Systems (SQL queries & design), UI/UX Design (user-centric design principles)

## Technical Skills

---

**Programming Languages:** C, Java, JavaScript

**Web Technologies:** HTML, CSS, JavaScript

**Libraries / Frameworks:** React, Node.js, Express.js

**Databases:** MongoDB, MySQL

**Tools:** Git, VS Code, Postman

**Backend:** PHP, REST API Development

**UI/UX & Analytics:** Figma, Adobe Photoshop, Framer, Excel, Power BI

## Projects

---

|                                                                                                                            |                   |
|----------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>SkillsSwap</b><br><a href="https://github.com/SruthikaPalanisamy/Skillswap">github.com/SruthikaPalanisamy/Skillswap</a> | <i>MERN Stack</i> |
|----------------------------------------------------------------------------------------------------------------------------|-------------------|

- Developed a skill-exchange platform enabling users to learn and offer skills mutually.
- Implemented authentication, role-based access control, and Socket.IO chat.
- Designed a scalable backend using MongoDB.

|                                                                                                                                         |                   |
|-----------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Food Recipe Manager</b><br><a href="https://github.com/SruthikaPalanisamy/Foodreceipe">github.com/SruthikaPalanisamy/Foodreceipe</a> | <i>PHP, MySQL</i> |
|-----------------------------------------------------------------------------------------------------------------------------------------|-------------------|

- Built a full-stack food recipe management system with categorization and search.
- Implemented admin CRUD operations and user-friendly UI.

|                                                                                                                                                    |                          |
|----------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| <b>Geolocation Attendance Tracker</b><br><a href="https://github.com/SruthikaPalanisamy/Geolocation">github.com/SruthikaPalanisamy/Geolocation</a> | <i>Flutter, Firebase</i> |
|----------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|

- Developed a mobile attendance system using Flutter and Firebase with real-time database support.
- Integrated secure authentication and CRUD operations for attendance records.
- Awarded Best Project Prize at Inter College Ideathon for innovation and impact.

## Experience

---

|                                                 |                     |
|-------------------------------------------------|---------------------|
| <b>Executive Member – CSD Coding Club</b>       | Mar 2025 – Mar 2026 |
| <b>Executive Member – Self Development Club</b> | Aug 2024 – Oct 2024 |

## Awards

---

- **Paper Presentation (Gaming using Blue Eye Technology)** – 1st Prize (Inter College Level)
- **Ideathon 2024 (Geolocation Attendance Tracker)** – 3rd Prize (Inter College Level)
- **Hackathon 2026 (IEC – Green Biz)** – 1st Prize (Inter College Level)
